| Title                                                                                              | URL | Authors          | Host item title |
|----------------------------------------------------------------------------------------------------|-----|------------------|-----------------|
| The assessment of ship damage consequences by a fast simulation of compartments flooding           |     | Braidotti, Luca  |                 |
| Numerical modelling of the effects of biofouling on ship resistance and propulsion characteristics |     | Farkas, Andrea   |                 |
| Razvoj numeričkog modela za procjenu dodatnog otpora broda na valovima                             |     | Martić, Ivana    |                 |
| Optimization of thruster allocation for dynamically positioned marine vessels                      |     | Valčić, Marko    |                 |
| Enhanced station keeping analysis in early design stage of offshore vessels                        |     | Mauro, Francesco |                 |
| Model određivanja širine ograničenih plovni putova                                                 |     | Barić, Mate      |                 |
| NUMERIČKA OPTIMIZACIJA HIDRODINAMIČKIH ZNAČAJKI FORME BRODA U MIRNOJ VODI                          |     | Legović, Dunja   |                 |
| Coupled nonlinear parametric resonance model for container ships                                   |     | Turk, Anton      |                 |
| Ocjena prihvatljivosti pomorskih plovidbenih rizika                                                |     | Mohović, Đani    |                 |
| Numeričko modeliranje optjecanja plovnog objekta                                                   |     | Dejhalla, Roko   |                 |
