| Title                                                                                                                                | URL | Authors             | Host item title |
|--------------------------------------------------------------------------------------------------------------------------------------|-----|---------------------|-----------------|
| Dynamics versus kinetics in complex liquids                                                                                          |     | Jukić, Ivo          |                 |
| Design of new heterogeneous catalysts for renewable energy based on metallic quantum clusters and the surrounding                    |     | Mravak, Antonija    |                 |
| Ab-initio Quantum Monte Carlo study of ultracold atomic mixtures                                                                     |     | Cikojević, Viktor   |                 |
| Ultrahladni bozonski sustavi proučeni kvantnim Monte Carlo metodama                                                                  |     | Dželalija, Krešimir |                 |
| On the nature of structural fluctuations in complex liquids                                                                          |     | Požar, Martina      |                 |
| Stabilnost i univerzalnost malih kvantnih klastera te adsorpcijski utjecaji grafena i cezija na osnovno stanje malih klastera helija |     | Stipanović, Petar   |                 |
| Osnovno stanje klastera helija i spin-polariziranog vodika                                                                           |     | Bešlić, Ivana       |                 |
