| Naslov                                                                                                      | URL | Autori             | Naslov izvornika |
|-------------------------------------------------------------------------------------------------------------|-----|--------------------|------------------|
| Magnetotransport properties of selected high entropy alloys                                                 |     | Kuveždić, Marko    |                  |
| Flexible devices based on layered 2D materials                                                              |     | Radatović, Borna   |                  |
| Fotoluminiscentna svojstva nanostruktura poluvodičkih materijala IV. skupine u dielektričnoj matrici        |     | Dasović, Jasna     |                  |
| Van der Waals epitaxy of two-dimensional transition metal disulphides                                       |     | Pielić, Borna      |                  |
| Self-assembled Ge/Si core/shell quantum dots in alumina matrix for application in photo-electric conversion |     | Nekić, Nikolina    |                  |
| Hybrids of biomacromolecules and modern two-dimensional materials                                           |     | Delač Marion, Ida  |                  |
| Effects of superstructuring on optical and transport properties of selected layered materials               |     | Velebit, Kristijan |                  |
| Dinamika i struktura otopina soli deoksiribonukleinske kiseline                                             |     | Grgičin, Danijel   |                  |
| Manipulation of dirac electrons through the nanoscale modulation of epitaxial graphene                      |     | Šrut Rakić, Iva    |                  |
| Utjecaj kristalnih defekata na fazna pobuđenja u valovima gustoće naboja                                    |     | Dominko, Damir     |                  |
